

*BUCKS COUNTY CONSERVATION DISTRICT
SITE STABILIZATION GUIDELINES*

In response to a Department of Environmental Protection regulation calling for "immediate" stabilization of disturbed areas of construction sites, the Bucks County Conservation District interpretation is for temporary stabilization to occur within 72 hours and for permanent stabilization to occur within seven days. These guidelines may be modified by District field inspectors depending on specific site, climatic, logistic or other conditions.

Approved by District Board of Directors on June 12, 2002
