

# BUCKS COUNTY CONSERVATION DISTRICT

1456 FERRY ROAD, SUITE 704  
DOYLESTOWN, PA 18901-5550

*In Pursuit of Environmental Excellence*

## Ways to avoid enforcement

Any site with one or more of the following violations can be subject to enforcement action:

- Direct pumping of sediment-laden water into waters of the Commonwealth.
- Major earth disturbance prior to the installation of all sediment controls. (i.e., properly installed and functioning traps and basins.)
- Removal of sediment controls before the contributing drainage area is stabilized.
- Failure to install sediment controls.
- Operating construction equipment in a stream, wetland or other waters without appropriate permits.

These points serve as an aid to keep project sites in compliance with Chapter 102, Erosion and Sediment Control, and Chapter 105, Clean Streams Law. (Bucks County Conservation does not regulate Chapter 105 activity) If you have any questions, contact the Bucks County Conservation District (215-345-7577.)

## At all earth disturbance sites

Stones, mud, dirt and/or construction debris must be removed from all roadways immediately upon observation by contractors, developers, etc., and/or their agents, or municipal personnel. Under no circumstances will stones, mud, debris, etc., be allowed to remain on road surfaces for any period of time.

It is your responsibility to take any actions necessary to remove any and all of these items from road surfaces immediately upon notice, or upon being directed to do so, regardless of whether or not you believe you are responsible. Failure to comply with this requirement is a violation and could result in work stoppage, penalties, violation notices or other remedies.

## International Fire Code

The International Fire Code requires that when an interior road (or roads) are required for residential housing, such roads (temporary or permanent) must be of sufficient strength and width to carry emergency vehicles (including fire trucks) prior to the start of building construction.
